GALLERY SKART is an avant garde space established in the art district of Santa Monica, owned and curated by award winning Icelandic Architects Erla Dogg Ingjaldsdottir and Tryggvi Thorsteinsson.

Developed to investigate the inter-connective relationship with architecture and the fine arts, SKART will explore the link between the unique, established Minarc architecture and the contemporary arts from around the world.

SKART exhibitions will anticipate the newest trends in art and design within a spirit of inventiveness. SKART Gallery will position itself as a space of creativity; one that is recognized for its dedication to artistic innovation, a center of architectural inquiry that embraces contemporary art and ideas.
